## **Project Title:** *2001: A Space Odyssey* **Website**

I want to build this site in two pages. I want the first page to serve as the landing page / explanation of the movie's plot, in the form of a long scroll of images. The second page will be separated into the three parts listed below, with navigation at the top of the page. I will probably include the link to the second page at the end of the first page, to encourage the image experience first.

- Home Page/Introduction — landing-page style introduction of the movie, suggesting some of the main themes/implications
- Plot — mostly still images from the movie, with light explanatory text. Will probably include some interpretations of the movie in this section too
- Cast
- Development — relevant points about the inspiration/creation
- Reception — relevant reviews/accolades/influence the movie has had
